University of Toronto Chapter

EWB UofT's newest Junior Fellows, David Boroto (left) and Rachel Mandel (right)

FELLOWS!

On behalf of everyone at EWB UofT, we would like to extend an EWBodacious round of congratulations to David Boroto and Rachel Mandel, who have been chosen to be our chapter's Junior Fellows for this year!

David Boroto:

David's actions are driven by an intense love for and dedication to his community - and fun! Inspired by his father, David endeavours to spend his life working in an African country doing civil engineering/infrastructure work.

Rachel Mandel:

Rachel's passion for what she believes in is unwavering. She dreams of working as an environmental engineer in the Arctic Circle - where she aspires to tackle the unique challenges of the region head-first.

Far from being diamonds in the rough, David and Rachel were chosen amongst a highly competitive pool of applicants who proved themselves to be amazing and talented young leaders with an admirable dedication to net positive social change. As such, we thank everyone who applied for this year's Junior Fellowship, in addition to our Return Junior Fellows from past years for their help and support throughout the selection process. (Yes, we mean YOU - Christine, Haroon, Quinn, Ben, and Anamjit!)

Panel Discussion on International Development

7:00-8:30PM on Monday, December 5th
SF 1105 (Sanford Fleming Building)

Poverty, injustice, and inequality are complex issues. There is no one "correct" way to approach these problems, but rather a variety of approaches that address them uniquely.

Join Engineers Without Borders, Bridges to Prosperity, and the UofT Global Brigades as they discuss their individual approaches to international development and debate the benefits and flaws of each! It promises to be a great discussion!

Innomasters is Hiring!

Innomasters is a program for high school students based on Engineering Strategies and Practices. Starting in January, students will pick a problem in their schools or communities and, with the guidance of university student mentors acting as their TAs, solve the problem using the method taught in first semester ESP.

If you'd like to be a mentor for this initiative, please fill out [this form](#). This opportunity is open to all engineering students who have completed ESP I, including first year students!

On behalf of EWB U of T's JF, ML, and YE lead(s),

Ghazal Sondhi
VP Marketing 2016-2017
